Note: A confirmation email will be sent to you within 2 business days after receiving your registration. If you don't receive one, please contact Linda Seppey on 845.862.6700.

About this training:

Cardiopulmonary Resuscitation (CPR) is a life-saving skill and a crucial component in the chain of survival for individuals in cardiac arrest. CPR provides life sustaining oxygen to the brain and vital organs which can be irreversible damaged within minutes. An individual's ability to recognize the signs and initiate CPR while awaiting the arrival of EMS could not only be the difference between life and death but also the quality of that life saved. The First Aid segment will teach participants to recognize the onset of stroke, control bleeding, administration of naloxone (when an opioid overdose is suspected), and epinephrine for an individual suffering an extreme allergic reaction.

American Heart Association.

Please join us to learn these critical lifesaving skills.

Attendees who complete the program will receive
a Certificate of Completion from the American Heart Association, along with a personalized first aid kit.
